With Panasonic phones make sure you select **No** for "One ring for blocked calls" in step 2 left. Also be sure to use the "Block a single number" command on step 2 on the right. **If the phone does not have at least 1 blocked number the First Ring Off feature will not work.** Adding a single dummy number to the blocked call list like 888-888-8888 will activate the feature for **ALL numbers**.
